PROFILE

- I am a front end web developer from the Provo, Utah area. My professional experience includes programming in React, Angular, Javascript and Node as well as many other front-end technologies, compilers, and testing frameworks. I love the opportunity to channel large amounts of data into an elegant web solution that creates an amazing user experience. I believe that programming with these object oriented frameworks leads to better code that is more maintainable and scalable leading reduce spending and saving time.

AREAS OF EXPERTISE

- Languages:** React, Angular, Javascript, JSX, HTML/HTML5, CSS/CSS3, SQL, OOP
- Frameworks/Libraries:** React, Redux, Angular 1.x, jQuery, Node.js, Express.js, Passport.js, Mocha, Chai, Typescript, Bootstrap
- Other Proficiencies:** SQL, Postgress, MongoDB, GIT, NPM, GULP, Webpack, JSON, Yarn, Databases, Atom, Bash, CDN, VIM, AJAX, Axios, Fetch, REST, RESTful API, MVC, Mac OS X, SASS, SCSS

WORK EXPERIENCE

Young Living

2015 - 2017

Team Lead

- Helped with testing and development of new chat / email platform; tested basic functionality, load testing, level 1 security, and basic database integrity; contributed to client side and company side UI design.
- Developed new agent reporting program which was used to show agent performance over time (daily, weekly, monthly and quarterly) over the key 5 performance areas.
- Developed new team tracking program for supervising managers to show their team trends, identify key areas of performance and allow tracking of program implementations as well as incentive distribution.
- Data audits; wrote program that imported CSV files, performed basic data audits and reported anomalies that alerted supervisors of problems that needed to be investigated further for corrective action.
- Finding and reporting bugs including all relevant information for duplicating situation and follow-up to ensure bugs had been resolved.

Boy Scouts

2017 - Present

Webmaster

- Lone web developer for a local community Boy Scout troop. I was in charge of redesigning and maintaining the troop website using React with Redux, Javascript, Node, and MySQL.
- Utilized end point testing with Mocha and Chai to verify correct data was being returned by the database.

UVRMC

2012 - 2014

Patient Care Technician

- Detailed data entry of all patient care including all vital statistics, patient activity, doctor and nurse interactions, and more.
- Analyzing data for use in patient care and in report to Doctors, Nurses and other technicians regarding patient's continuing care.
- Occasional use of high tech equipment for patient resuscitation
